

RIG MATS

IN-STOCK AND READY TO GO
PURCHASE, RENT, AND RENT TO
OWN OPTIONS AVAILABLE

Heavy duty platforms serve as a critical base for rigs, tank farms, pipeline construction and many other oil and gas applications.

We construct rig mats that offer easy setup, dependability and meet our customer's needs.

Featuring a variety of in-stock 8' x 20'/30'/40' rig mats with 3 or 4 beam steel frame, built at least 6" thick.

Built with side beam shackles for easier lifting and placing, this is ideal for projects where mats have to regularly change location.
